Languages:	German (native), English, Italian and French

Professional Summary

Supply Chain and Logistics SAP consultant with > 25 years' consulting experience. Throughout the career I have taken on various project deployment roles, ranging from project management, SAP solution architecture, training to cross application functionality such as master data governance, EDI, variant configuration. The initial specialisation was in manufacturing solutions covering planning, MRP, shop floor control, variant configuration, warehouse and inventory management, purchasing, repetitive manufacturing. Since 2004 the focus of the work was on sales and service processes as well as distribution and shipping processes (including warehouse management, 3PL logistics integration, transportation and some retail assignments). Besides SAP functional and process consulting I was also involved in many business cases and feasibility studies around supply chain and sales processes; and I managed several times teams of logistics consultants in consulting companies.

Work Experience Summary

SAP Modules functional knowledge:	MM, SD, PP, LE / WM, logistics and finance master data (each > 5 years), sound knowledge of PM, IS Retail logistics, SAP CRM and SAP project methodology
ERP integration knowledge	Intercompany logistics integration, variant configuration, ERP sales and purchasing web shop and portal integration, sales and purchasing EDI, multi-modal logistics integration, product costing and profitability analysis
